The workshop (which builds on previous workshops held at the Australian National University) will cover current research in all aspects of high dimensional integration and approximation. It will be open to all with an interest in the area. It is being organized under the auspices of MASCOS (the ARC Centre of Excellence in Mathematics and Statistics of Complex Systems), the CMA (the ANU’s Centre for Mathematics and its Applications) and the DFG SPP 1324: Extraction of Quantifiable Information from Complex Systems.
